

MercuryLearn Course on Inventories:

9 October – 26 November 2017

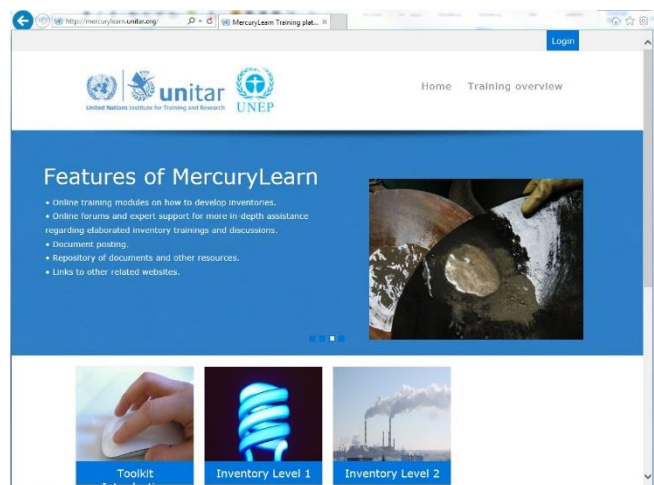

MercuryLearn is an online training platform to assist you in developing a comprehensive inventory on mercury releases and emissions, using the standardized Toolkit available from UN Environment.

The Course

The next course is scheduled for **9 October – 26 November 2017**. The course is divided into two parts, over seven weeks:

1. Inventory level 1, during the first two weeks
2. Inventory level 2, for the final five weeks

At the beginning of each week, participants will receive a schedule for the week and relevant material. Participants will also benefit from the conversations taking place in our dedicated forums and we will guide your learning throughout the course.

Course Requirements

Upon successful completion of each part, a participant will receive a certificate. Completion requires active participation and success in the tests. More detailed information will be given at the opening of the course. Study time is estimated at five hours per week.

Registration for the Course

UNITAR is now inviting participants to register: <https://goo.gl/forms/dMuBgb002Nah8iuT2>.

The course is **free to access**; there is no cost to participants. The course is in English. Please feel free to share the information with your colleagues.
