Note: NPI data is not available from Friday 11.55 pm to Saturday 6.00 am Australian Eastern Standard Time (Europe: Friday pm; US: Friday am).

## Welcome to Australia's national database of pollutant emissions

### Overview - [2001 - 2002 NPI Data](#)

The NPI now holds emission data for close to 3000 facilities, 32 airsheds and 29 catchments around Australia. Emissions are estimated for industrial facilities across Australia, and for diffuse sources such as transport and domestic activities in airsheds, and agriculture in catchments. Emissions data from facilities are provided by the facilities concerned.

### Search the NPI

- [Location](#) - emissions in your neighbourhood or state
- [Substance](#) - descriptions and emissions of substances
- [Source](#) - emissions from industry and other sources
- [Facility](#) - emissions from individual industrial facilities
- [Combined Search](#) - search all of the above categories

### Using NPI Data

- [Make a Map](#) - showing emission sources
- [Download Data](#) - for further offline analysis
- [Guide](#) - to help find NPI data

### Quick Find

Find your postcode (Try 3121)

 

Find a facility (Try BHP)

 

The [disclaimer](#) has further information about the use of NPI data.
