

Pornpit Silkavute

Director, Hazardous Substance Control Group, Bureau of Cosmetics and Hazardous
Substance Control, Ministry of Public Health
Thailand

Coordination is a common problem at national level. We appreciate UNITAR's strategy to request support letters from other relevant ministries when applying for UNITAR assistance. The most critical problem is that countries' capacities and capabilities are not keeping up with the implementation of international agreements. If feasible, capacity building should be done in parallel with the negotiation of international agreements. This is the challenge for UNITAR. Also, assistance from donors should fulfill country-specific needs.
